

ZigZag Jellyroll

The picture is 16 twelve inch blocks which takes 32 strips. If you do 20 blocks, 4X5, then you use 40 strips, the complete jellyroll.

1. Each block takes 2 strips. Try to sort your roll into light-dark or some other order.
2. Sew pairs of strips together. You will have 16 pairs for the quilt to the right.
3. Press and cut into 4.5" pieces. You should have 9 pieces.
4. Then lay them out. This is an alternate block quilt. So half of the blocks are laid out one way and the other half the other way.
5. Please note in the picture. The pink blocks have a horizontal block in the center and the purple block has a vertical block. And NO you can not just turn them. The darks and the lights will be wrong.
6. So essentially you have a 12 inch nine patch.
7. Then assemble the blocks following the picture.
